Introducing the brand new guidebook to almost 400 climbs in Morocco's Todra Gorge:

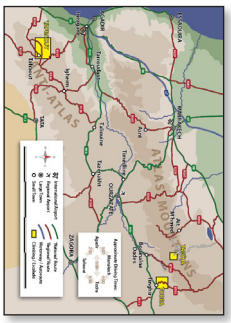
TODRA

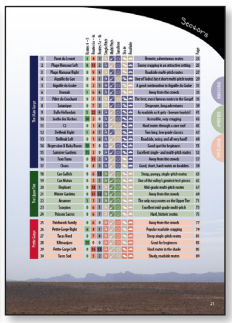
Rock Climbing in the Todra Gorge

Lying on the southern fringe of the High Atlas is one of Morocco's premier climbing destinations - the magnificent Todra Gorge. Here, under year round sunshine, you will find a climbing experience like few others: an enticing blend of adventure and exotic culture.

The gorge is home to almost 400 recorded routes, and whilst most of them are fully bolted sport climbs there are also some long, adventurous traditionally protected routes on stunning vertical walls. Sunshine and shade is available throughout the year, making this one of the few places in Morocco where it is possible to climb year-round, whether you're looking for single pitch, low-commitment sport cragging, or 10-pitch bolted adventures.

This new Pocket Guide is the most comprehensive and up to date topo currently available for this exotic climbing destination, featuring photo topos for 30 of Todra's most famous and popular climbing sectors, alongside detailed maps and background information.





The Oxford Alpine Club was founded in 1876. As a publisher we specialise in creating guidebooks to 'off-the-beaten-track' destinations, striving to promote parts of the world where the climbing is second-to-none, and the spirit of adventure still very much exists. We are always on the lookout for new authors and new suppliers – please contact us online if you would like to work with us, or stock our products.
